BetterDesktopTool Crack+ Keygen For (LifeTime)

Screensaver Manager is an all in one windows screensaver manager. It manages user defined screensaver collection in the form of packages (folders). You can create and manage screensavers as package by setting its name, target folder, short description, user defined macros, images and preview image, sound file, duration, repeats, animation speed, images transitions and more. You can view your collection of screensavers as a list and select to run or not. You can also configure the screensaver as not to run on log on startup, or to use a specific desktop. You can synchronize screensaver packages through network, floppy, or cd/dvd. If you need a screen saver which is running on startup, turn-off the autorun. You can customize the log on screen with your own picture. You can also change the log on user details. You can add new users to the log on account. You can start a screensaver package with log on user. You can view and set screensaver preference option for single or all log on users. You can select the package with preview image and sound. You can preview a package before you run it. You can set screensaver properties as no screen, screen lock, running on log on startup or not running on log on startup. You can share or delete packages. It also supports uninstallation. Screensaver Manager does not have any sort of dependency on third party applications and will work with any version of Windows. Simply Show Active Windows (SSAW) can be a very useful tool if you want to always keep the focus on the active window and hide all the inactive windows of the current workspace. By default, SSAW hides windows with the status of "Minimized", but you can change this behavior so it displays the hidden windows with the same behavior as the "Normal" windows. Besides, you can hide all windows of the current workspace, using the "Hide All Windows" option, or you can hide specific windows of a specific application, using the "Hide All Windows of a Specific Application" option. Finally, there's also the option to Show Only the Unrestored Windows, which can be a very useful option if you want to concentrate only on the currently active windows of the current workspace. Designed for Windows 10, SSAW makes it possible to show different windows on the desktop, including the minimized ones, and to hide all the windows not belonging to the current workspace. SSAW is a very useful tool for anyone interested in getting more work done and minimizing the impact of Windows on the desktop.

Simply Show Active Windows (SSAW) Features:

- Hide all (or specified) windows of a specific application
- Hides all the inactive windows of a specific workspace
- Show/hide all (or specified) windows of a specific workspace
- Show all (or specified) windows of the current workspace
